University

# Mitul Patial

## Front-End Web Developer

Dynamic and results-driven Front-End Web Developer with learning enthusiasm. Proficient in a wide array of web technologies. Adept at developing mobile-first responsive interfaces while optimizing app performance. Collaborative team player with excellent communication skills, dedicated to staying updated with industry trends and best practices. Seeking to contribute my expertise in creating a high-performance web app to drive user engagement and satisfaction.

## Experience

### August 2022 - Present

Tales of Timber | Delhi

#### Front-End Web Developer Intern

- Designed and developed responsive and cross-browser-compatible web applications using HTML5, CSS3, and JavaScript.
- Implemented modern front-end frameworks (React.js, Redux, React Query, Styled components) to create interactive and dynamic web interfaces and dark mode toggle options with separate dark mode UI.
- Developed the database for the company products with CRUD operations and the customer login with authentication with the help of Supabase.

### April 2019 - January 2022

Genpact | Gurgaon

#### Process Associate

- Determined operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions.
- Investigated problem areas in the process flow and process automation.
- Provided information by collecting & analyzing development and service issues.

## Projects

### Online food delivery web-app

Repository: <https://github.com/mitulpatial/pizza-project.git>

Deployed: <https://react-project-pizza-co.netlify.app>

- Built the project for a food delivery business where the data including Menu, Order and Price is fetched from an open API
- Components-based files are divided on the basis of 4 features namely: Cart, Menu, Order, User
- ReactJS-based project built with the help of third-party libraries like Redux toolkit, TailwindCSS and React Router

### Bill splitting app

Repository: <https://github.com/mitulpatial/pizza-project.git>

Deployed: <https://split-bill-react.netlify.app>

- Developed a basic react app for splitting the food and restaurant bills among friends or colleagues
- The app displays the list of ongoing splitting transactions
- The app additionally gives you the option to add a new account and split the bill accordingly (hooks used for state changes)
